ACCADO[®]

ACCESSORY SYSTEMS

ACCADO was established in Antalya in 2009 for unconditional satisfaction of PVC windows and doors sector clients in TURKEY .
The total area of the factory is in the excess of 8000 m².

High levels of investment in technology and skilled employee is made in order to meet the demand of both domestic and foreign customers.
Consistent high quality production, wide range of products, skilled technical support and the development of the modern logistics infrastructure assures the brand to hold a strong position among its competitors.

The production of the Tilt and Turn System starts at the end of the year 2010.

With the new products and the automated manufacturing process the total area of the company reaches to 15.000.m² and a work force of 300 employees. Research and development and modern automated manufacturing present a powerful potential to meet the needs of clients.

1

ACCADO established a large-scale integrated factory in order to become the "leader" of manufacturing and sale of window and door fittings and accessories and continues manufacturing with its zinc-aluminium die-cast, sheet metal punching and bending (machines between 20 tons - 300 tons), plastic injection, electrostatic powder coating, wet painting and galvanic zinc coating departments.

The company is also granted with TSE certificates and also started the procedure of ISO 9001 and ISO 9000 certification.

Vision

"High Quality" - this is the first association that should arise from consumers at the mention of our brand.
ACCADO as the brand with its "High Quality" is going to settle on the world market as an immortal brand.

Mission

Providing high quality products and services equally to domestic and foreign consumers. Mentioned accessories **ACCADO** worldwide should be associated with high-tech products and professional service.

Export

Due to the latest technologies for producing accessories for windows and doors, **ACCADO** becomes a well known global brand and now is exporting to 26 countries.

In addition, many foreign trading companies operating in Turkey, send our products to their countries.

Quality Policy

ACCADO, which produce accessories for PVC windows and doors, create a new policy of quality management.

The principles of this policy:

With the joint participation of all our employees,

In collaboration with our customers,

Efficient use of resources

Compliance with national and international standards, without prejudice to our products and with high quality services

Conscious of continuous improvement and development,

Provide a high level of customer satisfaction.

Our company continues to develop its business and expanding our product range in the following directions:

- Aluminum handle groups
- Zinc connection elements
- Tilt and turn system
- Side hung gears and door lock espagnolettes
- Sliding runners, steel fasteners, plastic products.

ACCADO doesn't do any difference between domestic and foreign market, provides high quality products and services on the way to world fame "produces accessories for windows and doors."

General information

1. Product information and specified application

According to this definition, side hung and tilt-turn hardwares are one hand-operated window and door hardwares which are used in building constructions. By turning one handle, it enables window and balcony door sashes to open into side hung position or into a limited ventilation position due to a scissors mechanism (sash-stay).

Side hung and tilt-turn hardware is used on vertically installed windows and balcony doors made of timber, pvc, aluminum or steel and their corresponding material combinations. Conventional side hung and tilt-turn hardware, as covered by this definition, locks window and balcony door sashes and enables various ventilating positions. When closing, the gasket counter force must be overcome as a rule. Differing applications do not correspond to its specified application.

Burglar-resistant windows and balcony doors, windows and balcony doors for damp rooms and those for use in environments with aggressive, corrosive air content, require hardware adapted for the respective application and individually agreed upon performance features.

2. Misuse

- When obstacles are inserted in the opening vicinity between frame and sash, thus preventing its proper specified use.
- When window and balcony door sashes are pressed adversatively or uncontrolled (for example by the wind) up against the window reveals, so that the hardware, the frame material or other individual window or balcony door sash components are damaged or destroyed and/or if consequential damage can arise.
- When additional loads put on windows or balcony door sashes (for example if children swing on the window or balcony door sash).
- When while closing the window and balcony door sashes, someone reaches into the rebate between the sash and frame (injury hazard).

3. Liability

The respective entire hardware set may only consist of hardware components from ACCADO. In the case of inappropriately assembled hardware, and/or in case of non-original accessory components and/or non factory-approved components, no liability is accepted.

4. Product Information

The main goal of the products which are produced for all sorts of PVC and timber windows, is to offer the customer the required comfort. Therefore in the product range, there are alternatives suitable to the customer's demands and window types.

The security levels of the products, which are produced on the basis of basic security systems, can be easily changed. In some cases the change of the locking plate is sufficient to alter the security level. In other instances, the level of security is increased by changing the products. For security reasons, it is beneficial that the windows and balcony doors are produced according to specifications.

For preventing the sash from closing because of wind power when in tilt position, a snapper is mounted on the products. The wrong operation safety device or the sash positioner, which prevent the sash from being wrongly operated, can also be mounted to the product. Furthermore the resistance capacity is enhanced and the products have been developed so that the mechanisms work smoothly.

All mechanisms used at windows and balcony doors are produced in silver colour.

5. Product Performance

The ACCADO hardware can be used on all sashes up to 100 kg, as a standard. When sash weight exceeds 100 kg it is advised that ACCADO is consulted and additional hardware is supplied.

The presentation of the application diagrams on page 2.3 show the relationship between the permissible sash rebate widths and sash rebate heights, depending on various glass weights and/or thicknesses.

The resulting sash rebate dimensions or sash formats (vertically or horizontally) - as well as the maximum sash weight- must not be exceeded under any circumstances.

6. Maintenance

Security relevant hardware components are to be examined at least once a year for stability and wear and tear. Depending on the requirements, the fixing screws are to be tightened and/or parts to be replaced. In addition to this, the following maintenance work is to be carried out annually:

- All movable parts and locking points of the side hung and tilt-turn hardware have to be controlled and greased.
- Only cleaning and maintenance agents, which do not damage the corrosion protection of the hardware components, are to be used.

The hardware adjustments -particularly in the vicinity of the corner pivot rest and the scissors - as well as replacing parts and the unhinging and hinging of the active sash are to be carried out by a specialist company.

Turn-Only - GV

ACCADO
ACCESSORY SYSTEMS

The diagram illustrates the exploded view of the Turn-Only - GV system, showing the assembly of various components:

- Locking plate:** Located on the left side of the assembly.
- Corner transmission:** A U-shaped component at the top-left and bottom-left corners.
- Extension lock (Top):** A horizontal bar with a locking plate at the top center.
- Extension lock (Bottom):** A horizontal bar with a locking plate at the bottom center.
- Adjustable top hinge:** A hinge located at the top-right corner.
- Stay arm hinge:** A hinge located at the bottom-right corner.
- Stay arm bearing:** A bearing located at the bottom-right corner.
- Top hinge cover set:** A set of covers for the top hinge.
- Stay arm bearing:** A bearing located at the top-right corner.
- Adjustable middle hinge:** A hinge located in the middle-right section.
- Adjustable bottom hinge:** Hinges located at the bottom-right and bottom-left corners.
- Corner bearing:** A bearing located at the bottom-left corner.
- Top hinge cover set:** A set of covers for the bottom hinge.
- Locking plate:** A plate located at the bottom center.
- SRH / SRW:** Reference numbers for the parts listed in the table.

Turn-Only - GV Se

ACCADO
ACCESSORY SYSTEMS

The diagram illustrates the exploded view of the Turn-Only - GV Se system, showing the assembly of various components:

- Extension piece, 180°**: A long horizontal component.
- Locking plate Se**: Components shown include a top one and a bottom one.
- Middle lock Se (Top)**: A component shown at the top of the middle section.
- Middle lock Se (Bottom)**: A component shown at the bottom of the middle section.
- Adjustable top hinge**: A hinge component.
- Stay arm hinge**: A hinge component.
- Stay arm bearing**: A bearing component.
- Top hinge cover set**: A set of covers for the top hinge.
- 3**: A large number indicating a section or step.
- Locking plate Se**: Components shown include a top one and a bottom one.
- GV Gear F15**: Components shown include a top one and a bottom one.
- GV Gear F7,5**: Components shown include a top one and a bottom one.
- Adjustable top hinge**: A hinge component.
- Adjustable middle hinge 9 mm**: A hinge component.
- Adjustable middle hinge 13 mm**: A hinge component.
- Stay arm bearing**: A bearing component.
- Adjustable middle hinge cover set**: A set of covers for the adjustable middle hinge.
- Adjustable bottom hinge, 9 mm, Right**: A hinge component.
- Adjustable bottom hinge, 9 mm, Left**: A hinge component.
- Adjustable bottom hinge, 13 mm, Right**: A hinge component.
- Adjustable bottom hinge, 13 mm, Left**: A hinge component.
- Corner bearing**: A bearing component.
- Top hinge cover set**: A set of covers for the top hinge.
- SRH**: Spacing Reference Height
- Pcs**: Number of pieces
- ML**: Material Length
- PU**: Price Unit
- Article Nr.**: Article Number
- Article Nr. F15**: Article Number for F15 gear

ACCADO
ACCESSORY SYSTEMS

The diagram shows the exploded view of the Turn-Only - GC Se hardware. Components include:

- Locking plate Se**: Shown at the top left and bottom left.
- Extension piece, 180°**: A long horizontal bar with mounting brackets.
- Middle lock Se (Top)**: A locking mechanism for the top part of the extension piece.
- Middle lock Se (Bottom)**: A locking mechanism for the bottom part of the extension piece.
- Adjustable top hinge**: A hinge for the top of the extension piece.
- Stay arm hinge**: A hinge for the stay arm.
- Stay arm bearing**: A bearing for the stay arm.
- Top hinge cover set**: Cover plates for the top hinge.
- Stay arm bearing**: A bearing for the stay arm.
- Adjustable middle hinge 9 mm**: A hinge for the middle of the extension piece.
- Adjustable middle hinge 13 mm**: A larger hinge for the middle of the extension piece.
- Adjustable bottom hinge, 9 mm, Right**: A hinge for the right side of the bottom extension piece.
- Adjustable bottom hinge, 9 mm, Left**: A hinge for the left side of the bottom extension piece.
- Adjustable bottom hinge, 13 mm, Right**: A hinge for the right side of the bottom extension piece.
- Adjustable bottom hinge, 13 mm, Left**: A hinge for the left side of the bottom extension piece.
- Corner bearing**: A bearing for the corner of the extension piece.
- Top hinge cover set**: Cover plates for the top hinge.
- Tilt locking plate**: A locking plate for the tilt mechanism.
- Locking plate Se**: A locking plate for the profile.
- SRH / SRW**: Reference numbers for the parts.
